

Solenoid Valve Experts

Like many businesses we started small. Selling Shako 2/2 way normally closed solenoid valves to resellers and trade customers and learning new approaches as we went along.

That was over 24 years ago and we're now one of the leading solenoid valve stockists and distributors in the UK. So, what does that mean for you?

What does being a Connexion Developments customer mean?

One thing we really understand is the solenoid valve business, and what it takes for businesses of all sizes to succeed. That's why being a Connexion Developments customer means you'll get unrivalled technical support and service for all aspects of your business.

We're not just about carrying the right ranges of products, even though we do! In fact, with over 11,000 products and £2M stock across a quality range of exclusive brands for applications in the Solenoid, Pneumatic and Industrial Process valve sectors.

We understand that great service doesn't end once the product has left our warehouse, that's just the beginning. By listening to our customers, we've helped develop and acquire access to a unique range of products such as:

- Ultra-compact energy efficient WRAS motor actuated ball valves, some less than 5 Watts, sizes ¼ to 2" thread.
- 3 stage breathing air filter coalescing and carbon filter sets with filter status gauges
- ATEX Exd and Exia Hazardous area 2-, 3- and 5-way solenoid valves with SIL 3 approval up to 450 Bar
- Coaxial 2 + 3 way valves, solenoid or external pilot, manifold + customised solutions.
- Pressure reducing and sustaining valves.
- Air actuated valves including angle seat and ball valves.

Quality, Reliability and highly competitive sales and technical service making sure our customer experience is unmatched in the fluid power industry.
